

CougsNear.me

An exclusive WSU networking platform.

Requirements Analysis & Design Demo

Core User Authentication

1. User Authentication

- a. User's can log in & out using their @wsu.edu email address

2. Account Creation

- a. Visitors to the website will need an account to view content, so they must be able to create one. The email must be an @wsu.edu address and must be verified

Content & Interaction

1. Home Page
 - a. User views a personalized home feed that aggregates posts, notifications, and announcements relevant to their interests
2. Single Post
 - a. Users can create posts
 - b. Posts are available to view on the home page.
3. Profile
 - a. Users can customize how their profile will appear to other users on the platform.

Community Features

1. Network
 - a. Users search for and connect with other students or faculty based on shared interests, academic fields, or group memberships
2. Community
 - a. Users create new groups or join existing ones related to clubs, classes, Greek life, or other campus communities
 - b. Groups must be vetted for safety by an Admin before they are published
3. Notifications
 - a. Users receive and manage updates about interactions, group activities, and system alerts.

Professional Development

1. Jobs

- a. Companies can post job listings to the platform to target WSU students
- b. Users can find job opens around campus here

Administration

1. Admin Portal

- a. Allows Admins to make changes to the website, moderate, and post jobs

Login Interface

UX Choices:

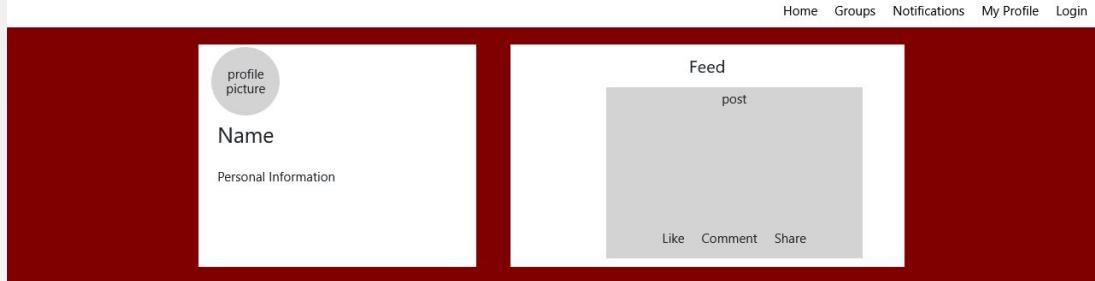

1. Clean, focused layout
2. Clear account creation path
3. Minimal form fields

The image shows a minimalist login interface. At the top right is the word "Login". Below it are three input fields: "Your username", "Your email", and "Your password", each with a placeholder text. At the bottom center is a blue rectangular button with the word "Login" in white. Below the button, there is a small link in blue text that reads "No Account? Create an Account".

Main Feed

UX Choices:

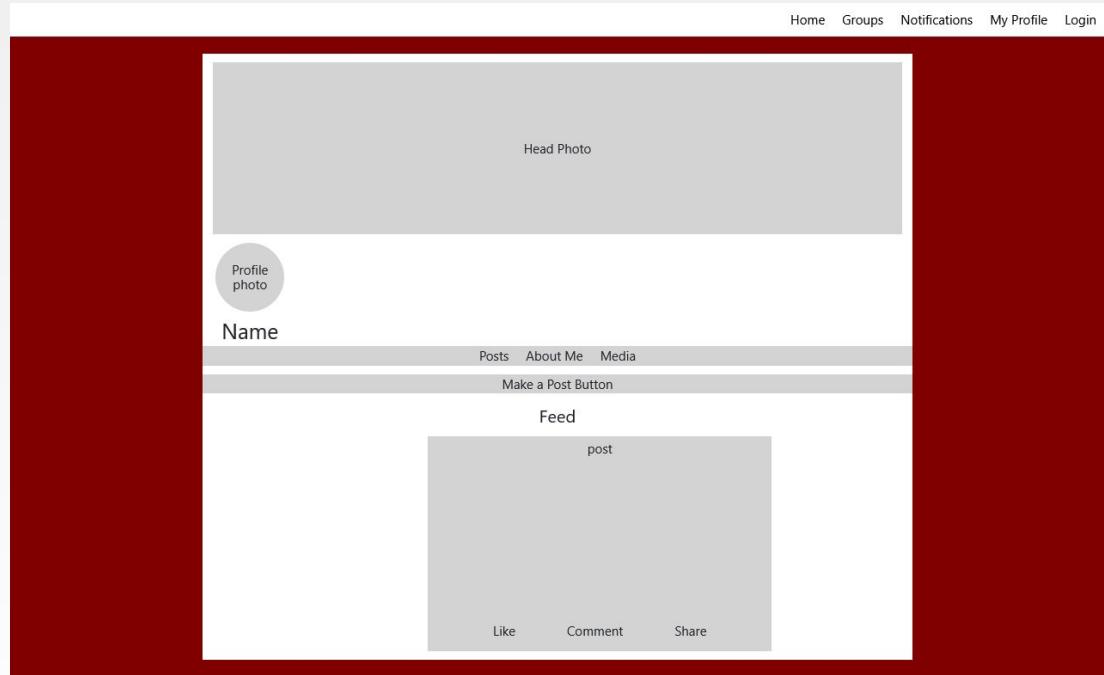

1. Two-column layout
2. Fixed navigation
3. Profile quick-view

Profile Design

UX Choices:

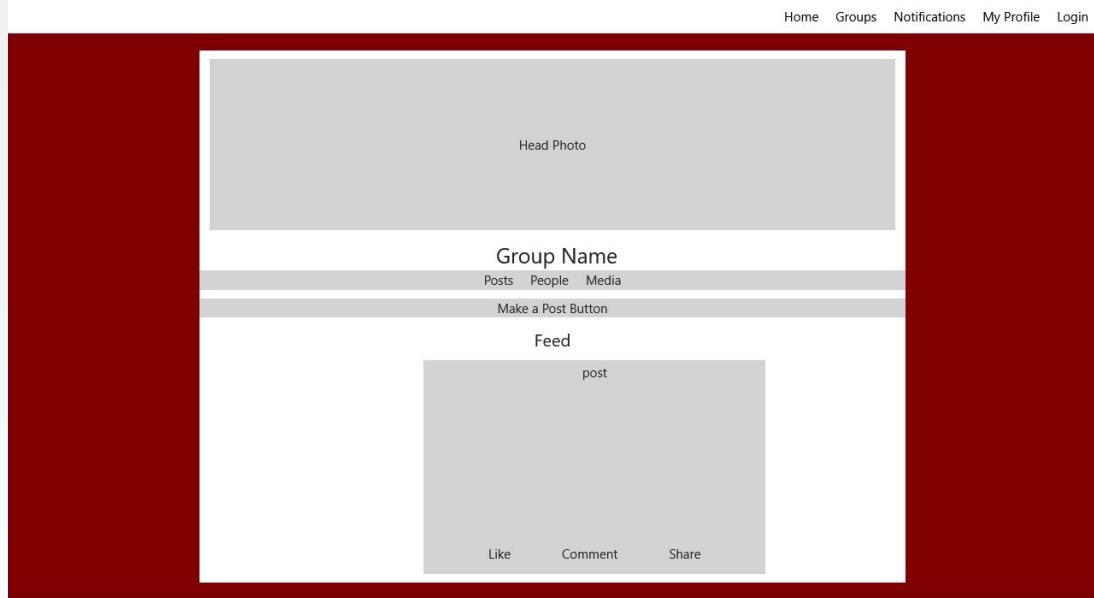

1. Header photo prominence
2. Tabbed content organization
3. Clear post creation

Group Interface

UX Choices:

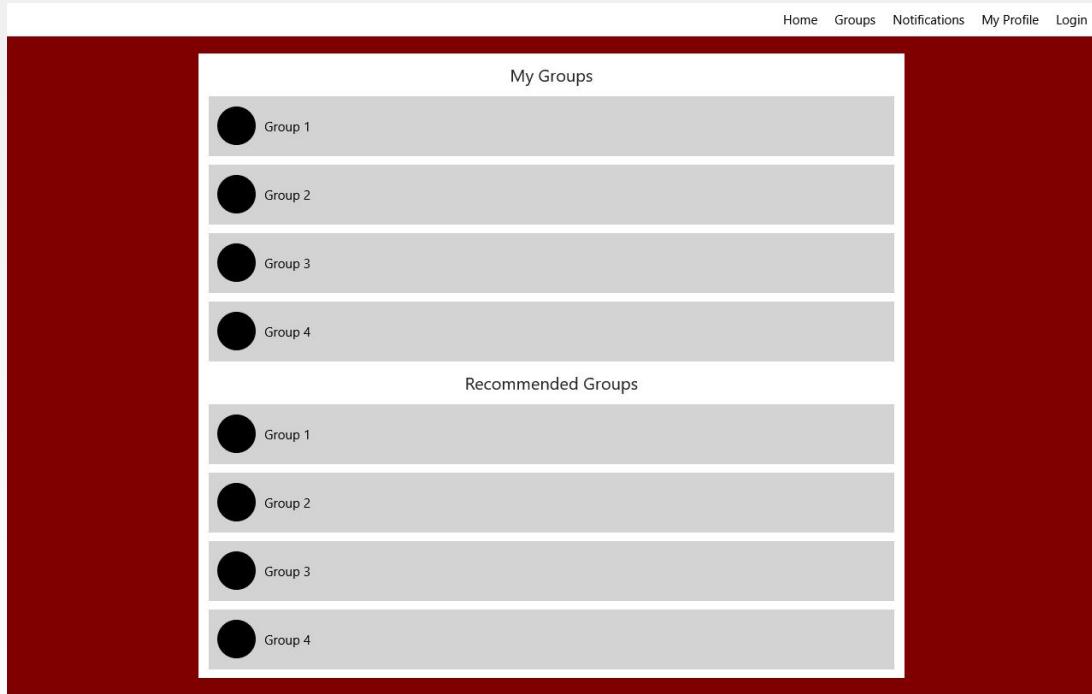

1. Consistent navigation pattern
2. Clear membership indicators
3. Engagement options

Network & Discovery

UX Choices:

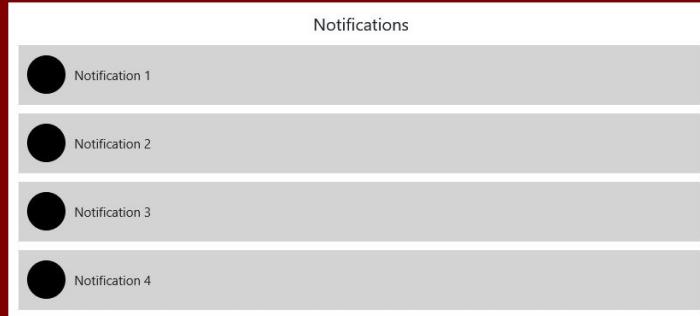

1. Two-section layout (My Groups/Recommended)
2. Visual group indicators
3. Simple join process

Notifications

UX Choices:

1. Clear, intuitive list presentation
2. Use of visual indicators for unread alerts (circle1)
3. Accessible through fixed navbar

Admin Control Center

UX Choices:

1. Minimalist task-oriented design
2. Clear visual hierarchy with circle indicators
3. Restricted access through role-based routing

Moderation Interface

UX Choices:

1. Tabular layout for quick scanning
2. Color-coded action buttons (green=approve/red=reject)
3. Audit trail through comment field

Moderate Content

Item ID	Content	Status	Action
1	Example content here...	Pending	<button>Approve</button> <button>Reject</button>

Moderation Comment

Enter comments or actions...

[Submit Moderation](#)

Job Listings and Details

UX Choices:

1. Dual-column layout for quick navigation and detail view
2. Category-based listing for recommended jobs (circle indicators)
3. Detailed job descriptions with qualifications listed for easy scanning

The image shows a user interface for job listings. On the left, a sidebar titled "Recommended Jobs" lists four items: "Job 1", "Job 2", "Job 3", and "Job 4", each preceded by a small black circle icon. To the right, the main content area has a header "Job Title" and four sections labeled "Qualification 1", "Qualification 2", "Qualification 3", and "Qualification 4". Below these sections is a large text block containing placeholder text: "This is a lot of text which will be used for the job description section."

Live Demo

Future Development

Planned Enhancements:

1. Job Board Implementation
2. Admin Interface
3. Enhanced Media Support
